

1. Milestone:

Update the SDKs

Eventstab

Searchbar should appear when scrolling up but the pull to refresh function should still be there.

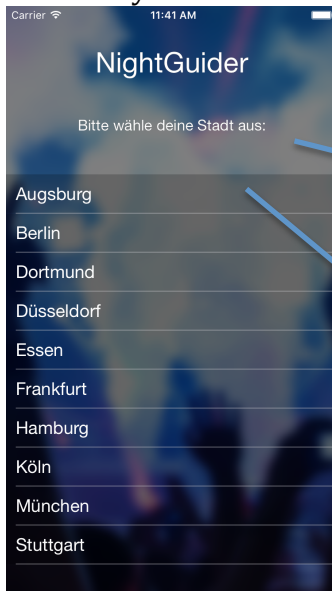

Replace the search Button on the right upper Corner to open a new view. This view should be the one from the search Tab.

Left Barbutton should open an Alertview if the user wants to change the City. By pressing yes it should open the City View. (Currently this View is showing after you press the Barbutton and after that „Stadt auswählen“)

Clubstab

When pressing the right upper Barbutton it should open the Map View

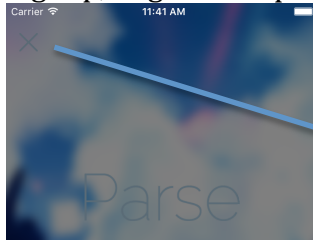

1.First time Open Select City

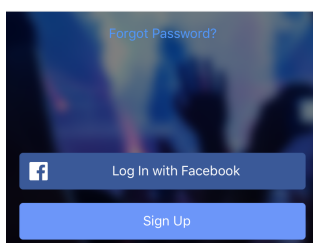

„Please choose you City:“

For testing choose Augsburg

Signup, Login or skip

Skip

2.Mainscreen

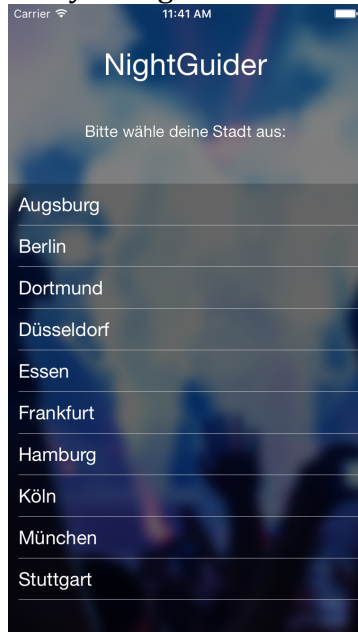

2.1 Eventstab

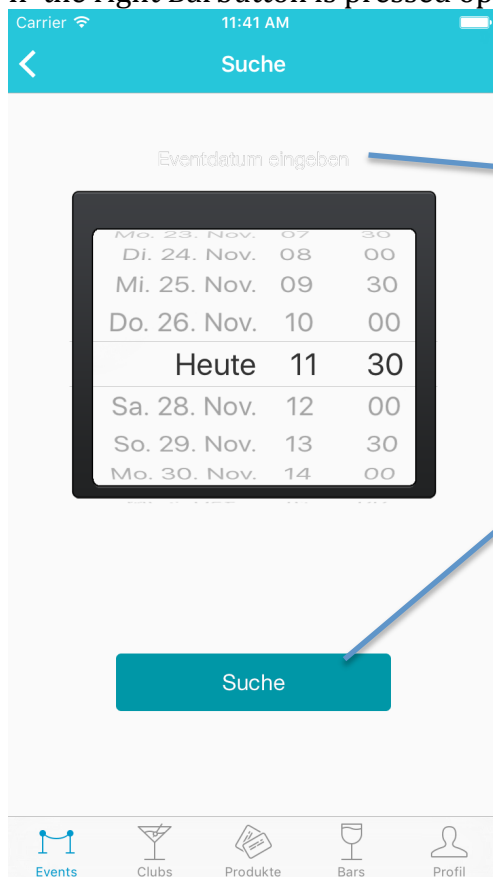

If left Barbutton pressed open Alertview

If city change is confirmed open the view to change the city

If the right Barbutton is pressed open the search view

„Enter Eventdate“

„Search“

2.2 Clubstab

Rightbarbutton should redirect to the map view
